

I read 1,500+ Claude skills so you don't have to.

MOST CLAUDE SKILLS ARE TRASH. THESE 40 ARE ELITE.

The exact skills top builders install to make Claude **10× faster**
— with links + install commands.

↓ SAVE THIS

WHAT EVEN IS A **SKILL**?

A folder that turns Claude into an instant specialist. Install once — it just **knows**.
Build video, audit security, write production React, cut your token bill.

INSTALL IN 10 SECONDS

```
# any public repo, in Claude Code  
npx skills add <org>/<repo>  
# or drag the folder into Claude.ai → Settings → Skills
```

Golden rule → **install 5, not 50**. Each one adds overhead. Start with what you'll use this week.

IF YOU ONLY INSTALL 5

THE STARTER PACK.

1	 grill-me	Stops Claude building the wrong thing.	@mattpocock
2	 Caveman	-65% output tokens, zero info lost.	@JuliusBrussee
3	 Remotion	Prompt → finished MP4 video.	remotion.dev
4	 Superpowers	Gives Claude a senior-eng brain.	@obra
5	 Doc Skills	Real .pdf / .xlsx / .docx out.	@anthropic

Full breakdown + links on the next slides →

01

GRILL-ME

Claude keeps building the wrong thing.
This makes it **interrogate YOU** first — 50
questions, then 1 perfect feature.

★ 74K ON GITHUB

by @mattpocock

```
# Claude Code  
/plugin marketplace add mattpocock/skills · /plugin install grill-me
```

02

CAVEMAN

Same answers. **65% fewer tokens.** Claude talks like a caveman, your bill drops like a rock. Code stays byte-perfect.

#1 ON HACKER NEWS

by @JuliusBrussee

```
npx skills add JuliusBrussee/caveman
```

03

REMOTION

Type a sentence → get a finished **MP4**.
Claude edits video now. No editor, no
timeline, no cloud render bill.

117K INSTALLS / WEEK

by Remotion

```
npx skills add remotion-dev/skills # remotion.dev/docs/ai/skills
```

04

SUPERPOWERS

Give Claude a **senior engineer's brain** — TDD, real debugging, planning, subagents. 20+ battle-tested skills in one install.

★ 217K ON GITHUB

by @obra (Jesse Vincent)

```
/plugin marketplace add obra/superpowers-marketplace · /plugin install  
superpowers
```

05

KARPATHY MODE

The 4 rules that stop AI from over-engineering: **think, simplify, cut surgically, stay on goal.**

★ 144K

by Forrest Chang · from A. Karpathy

Also steal → **HANDOFF** (@mattpocock): compress a dead session into a brief, start fresh, lose nothing.

```
npx skills add multica-ai/andrej-karpathy-skills
```
