

MARSTON AI

BUILD FASTER · SHIP SMARTER

The Claude Skills

FOR AI BUILDERS · 2026 EDITION

The proven, done-for-you Claude Skills the best builders are actually using — hand-picked from GitHub, X and the community. Drop them in, level up Claude instantly.

Curated by **Marston Teodoro**

Marston AI · June 2026

35+ skills · full credits & links inside

BATTLE-TESTED SKILLS

Skills are the cheat code. This is the loadout.

A **Claude Skill** is a small folder — usually just a `SKILL.md` file with instructions, plus optional scripts and resources — that Claude loads *on demand* to become an instant expert at a specific job: building videos, writing production React, auditing security, cutting your token bill. You don't prompt-engineer it every time. You install it once, and Claude just *knows*.

This isn't a "how to build skills" doc. It's a curated stash of the **best skills that already exist** — proven on GitHub, gone viral on X, recommended on Reddit — with full credit to the people who made them. Steal freely. Ship faster.

How to install any skill in this guide

- 1 Grab the skill folder from its repo (the link is on every card).
- 2 Drop it into `~/.claude/skills/` for global use, or `.claude/skills/` inside a project. On Claude.ai, upload the skill in **Settings** → **Capabilities** → **Skills**.
- 3 Restart Claude Code (or refresh). It auto-detects the skill from the description.
- 4 Trigger it naturally — "make me a video", "grill me on this plan" — or run its slash command. Claude loads it only when it's relevant, so your context stays clean.

How this guide is organized. Nine sections, from the official Anthropic foundation to the viral game-changers, creative tooling, production web, security, growth and beyond. Each card tells you *what it does*, *why it's worth it*, *who made it*, and *where to get it*.

Official Anthropic

Viral on X

Video & Creative

Production Web

Security

Marketing & Growth

Data & Science

Mobile & Automation

Discovery Hubs

SECTION 01

The Official Foundation

Anthropic's own open-source skills (github.com/anthropics/skills, 146k★). If you install nothing else, install these. They make Claude produce real files and ship real interfaces.

Document Skills — pdf · docx · pptx · xlsx

ANTHROPIC

Create, edit and parse real Office & PDF files — tracked changes in Word, formulas and pivot tables in Excel, templated decks in PowerPoint, form-filling and merging in PDF.

Why: turns Claude from "writes about a report" into "hands you the finished .docx/.xlsx/.pdf." The backbone of every document workflow.

by Anthropic

github.com/anthropics/skills/tree/main/skills

mcp-builder

ANTHROPIC

Scaffolds a full Model Context Protocol server so Claude can wire up any external API as native tools.

Why: the fastest way to connect Claude to your own stack — go from API docs to working MCP server in one session.

by Anthropic

github.com/anthropics/skills/tree/main/skills/mcp-builder

webapp-testing

ANTHROPIC

Drives your running web app in a real browser via Playwright to verify UI, flows and regressions.

Why: Claude stops guessing whether the feature works and actually clicks through it.

by Anthropic

github.com/anthropics/skills/tree/main/skills/webapp-testing

frontend-design & web-artifacts-builder

ANTHROPIC

Design guidance that dodges generic "AI slop" aesthetics, plus a builder for rich HTML/React + shadcn/ui artifacts.

Why: the difference between a templated landing page and something that looks intentionally designed.

by Anthropic

github.com/anthropics/skills

skill-creator

ANTHROPIC

An interactive, guided builder for packaging your own repeatable workflow into a proper skill.

Why: the most useful skill is often one you build yourself — this is the on-ramp once you've outgrown the stash.

by Anthropic

github.com/anthropics/skills/tree/main/skills/skill-creator

Creative & Comms pack — algorithmic-art · canvas-design · slack-gif-creator · brand-guidelines · internal-comms · claude-api

ANTHROPIC

Generative p5.js art, PNG/PDF visual design, Slack-optimized animated GIFs, brand-consistent output, polished internal comms, and a Claude API helper.

Why: a grab-bag of quick wins that cover the everyday "make this look good / on-brand" asks.

by Anthropic

github.com/anthropics/skills

SECTION 02

The Viral Game-Changers

The skills that blew up on X and Hacker News in 2026 because they fix how Claude *thinks and talks* — not just what it builds. Highest ROI on this whole list.

grill-me

VIRAL · X

Flips the script: Claude interviews *you* relentlessly about your plan — sometimes 50+ questions over ~45 minutes — until every branch of the decision tree is resolved, then writes a single line of code.

Why: kills the #1 failure mode in agentic coding — Claude charging ahead on wrong assumptions. Pocock's [skills](#) repo hit ~74k★. **Install this first.**

by Matt Pocock

github.com/mattpocock/skills

Caveman

VIRAL · #1 HN

"Why use many token when few token do trick." Strips narration, filler and pleasantries from Claude's output — keeping every code block, error string and symbol byte-for-byte intact.

Why: cuts output tokens ~65% on average (up to 87%). Real money and context saved on long sessions. Hit #1 trending on GitHub and #1 on Hacker News.

by Julius Brussee

github.com/JuliusBrussee/caveman

Andrej Karpathy's Coding Guidelines

VIRAL · 144K★

Encodes Karpathy's four anti-frustration principles into one drop-in file: think before acting, prefer simplicity, make surgical changes, stay goal-driven.

Why: targets the three things that make agents maddening — silent wrong assumptions, over-engineering (50 lines → 500), and touching code it was never asked to. Went viral the week Karpathy posted.

by Forrest Chang (from Andrej Karpathy)

github.com/multica-ai/andrej-karpathy-skills

Handoff

VIRAL · X

Compresses a long, messy session into a clean markdown brief so you can continue in a fresh context window without losing the thread.

Why: the elegant fix for context rot — end a session, hand off, start fresh and fast.

by **Matt Pocock**

aihero.dev/skills-handoff

Superpowers

FRAMEWORK · 217K★

A whole methodology-as-skills: 20+ composable, battle-tested patterns — TDD (red-green-refactor), 4-phase systematic debugging, brainstorming, writing/executing plans, git worktrees, subagent-driven development.

Why: the most complete community skill library going. Turns Claude into a disciplined senior engineer with an actual process.

by **Jesse Vincent** (obra)

github.com/obra/superpowers

SECTION 03

Video, Design & Creative

Where Claude stops being a coder and becomes a content studio. The Remotion skill alone is worth the price of admission.

Remotion — Programmatic Video

OFFICIAL · REMOTION

Teaches Claude the full Remotion framework — React-for-video — so you can prompt animated explainers, product demos, data-viz videos and edits that render to MP4 locally. No After Effects, no cloud render bill.

Why: the standout creative skill of 2026 (~117k weekly installs). Type a prompt, get a real video. Insane leverage for AI builders making content.

by **Remotion**

remotion.dev/docs/ai/skills · github.com/remotion-dev/skills

Figma — implement-design & code-connect

OFFICIAL · FIGMA

Translates Figma frames into production code with real fidelity, and maps design components to your codebase components.

Why: closes the design-to-code gap that usually eats a day. Paste a frame, get faithful components.

by **Figma**

officialskills.sh/figma/skills

frontend-slides

by zarazhangrui

Animation-rich HTML presentations — decks that actually move, generated from a prompt.

github.com/zarazhangrui/frontend-slides

claude-d3js-skill

by chrisvoncsefalvay

Builds proper D3.js data visualizations — charts that go beyond the default chart library look.

github.com/chrisvoncsefalvay/claude-d3js-skill

web-asset-generator

by alonw0

Spits out favicons, app icons and social/OG share images in every size you need.

github.com/alonw0/web-asset-generator

shadcn/ui skills

by shadcn

Feeds Claude real shadcn/ui component context and enforces the right patterns instead of guessing.

ui.shadcn.com/docs/skills

SECTION 04

Ship Production Web Apps

Official skills straight from the platforms you deploy on. Each one bakes hundreds of hard-won rules into Claude so your code matches how the experts actually do it.

Vercel Agent Skills

OFFICIAL · VERCEL

A suite: **react-best-practices** (40+ perf rules), **web-design-guidelines** (100+ a11y/UX rules), **next-best-practices**, **composition-patterns**, **writing-guidelines**, and **vercel-optimize** (audits cost/perf/caching/billing).

Why: turns "it works" into "it's fast, accessible and cheap to run." Some of the highest-signal skills published.

by Vercel

github.com/vercel-labs/agent-skills

Stripe — best-practices

Official · Stripe

The right way to build Stripe integrations: idempotency, webhooks, edge cases — payments done correctly.

officialskills.sh/stripe/skills

Sentry — setup & fix-issues

Official · Sentry

Wire up Sentry in any stack, then find and fix production issues with full trace context.

officialskills.sh/getsentry/skills

Cloudflare — Workers & Durable Objects

Official · Cloudflare

Production Workers patterns and stateful coordination with RPC + SQLite Durable Objects.

officialskills.sh/cloudflare/skills

Expo — native UI & deploy

Official · Expo

Build cross-platform mobile apps with Expo Router, styling and navigation, then ship to production.

officialskills.sh/expo/skills

Netlify — Functions & DB

Official · Netlify

Serverless endpoints, background tasks, and managed Postgres with deploy-preview branching.

officialskills.sh/netlify/skills

Hugging Face — trainer & gradio

Official · Hugging Face

Train models with TRL (SFT/DPO/GRPO) and ship Gradio demos to HF Spaces.

officialskills.sh/huggingface/skills

SECTION 05

Security & Hardening

Before you ship, let Claude wear a red team hat. These come from people who break software for a living.

Trail of Bits Security Skills

OFFICIAL · TRAIL OF BITS

21+ security skills from one of the most respected audit firms: CodeQL & Semgrep static analysis, a **semgrep-rule-creator**, vulnerability detection, threat modeling, and **building-secure-contracts** covering six blockchains.

Why: professional-grade auditing baked into your agent. Catch the bug before an attacker does.

by **Trail of Bits**

github.com/trailofbits/skills

ffuf Web Fuzzing

COMMUNITY

Teaches Claude to drive **ffuf** for web fuzzing — including authenticated requests — to find hidden endpoints and parameters.

Why: hands-on recon for authorized pentesting and bug-bounty work, guided by an experienced hacker.

by **Jason Haddix** (jthack)

github.com/jthack/ffuf_claude_skill

SECTION 06

Marketing & Growth

You're an AI builder — building it is half the job. These turn Claude into a growth team that knows real marketing frameworks, not generic fluff.

Corey Haines' Marketing Skills

COMMUNITY · 50+ SKILLS

A full SaaS marketing stack as skills: conversion-rate optimization, copywriting, SEO audits, email lifecycle flows, paid ads (Google/Meta/LinkedIn/X), analytics, retention, growth engineering and strategy.

Why: from a well-known SaaS marketer — Claude stops writing vague copy and starts applying actual CRO and positioning frameworks.

by **Corey Haines**

github.com/coreyhaines31/marketingskills

Direct-Response Advertising Skills

COMMUNITY

Classic direct-response craft: customer-avatar work and Eugene Schwartz–style copywriting for ads that convert.

Why: pairs perfectly with the marketing pack when you're writing paid creative that has to sell.

by **Kim Barrett**

github.com/realkimbarrett/advertising-skills

SECTION 07

Data, Science & Mobile

Specialist skills for when the work gets technical — research, scientific computing, and shipping to phones.

claude-scientific-skills

by K-Dense-AI

Wires in scientific libraries and specialized database access for real research workflows and analysis.

github.com/K-Dense-AI/claude-scientific-skills

Firecrawl Skill + CLI

by Firecrawl

Web scraping, search and browser automation built for AI agents — clean data in, no HTML mess.

github.com/firecrawl/firecrawl

ios-simulator-skill

by conorluddy

Builds, boots and tests iOS apps in the simulator automatically — Claude can iterate on a real device window.

github.com/conorluddy/ios-simulator-skill

get-shit-done

by TÂCHES

Meta-prompting + spec-driven development system that keeps long builds on rails.

github.com/gsd-build/get-shit-done

playwright-skill

by lackeyjb

Standalone browser automation via Playwright — scraping, E2E flows and UI checks on any site.

github.com/lackeyjb/playwright-skill

Skill_Seekers

by yusufkaraaslan

Converts any documentation site into a ready-to-use skill — feed it docs, get a SKILL.md.

github.com/yusufkaraaslan/Skill_Seekers

SECTION 08

Where to Find More — Discovery Hubs

This guide is a curated starting line, not the whole field. When you want to go deeper, these are the best-maintained directories the community trusts. Bookmark them.

Hub	What's there	Link
anthropics/skills	The official source. Reference implementations + production document skills. 146k★.	github.com/anthropics/skills
VoltAgent/awesome-agent-skills	1000+ skills from official dev teams (Anthropic, Vercel, Stripe, Cloudflare, Figma...) and community.	github.com/VoltAgent/awesome-agent-skills
travisvn/awesome-claude-skills	Long-running, well-curated list of the best Claude skills and tools. ~8.7k★.	github.com/travisvn/awesome-claude-skills
karanb192/awesome-claude-skills	50+ hand-verified skills, actively maintained, neatly categorized.	github.com/karanb192/awesome-claude-skills
ComposioHQ/awesome-claude-skills	1000+ production-ready skills & plugins across many coding agents.	github.com/ComposioHQ/awesome-claude-skills
officialskills.sh	Browsable directory of <i>official</i> vendor skills, install-ready.	officialskills.sh
hesreallyhim/awesome-claude-code	Broader Claude Code list: skills, hooks, slash-commands, agents, plugins.	github.com/hesreallyhim/awesome-claude-code

Build faster. Ship smarter. Give credit.

Every skill in this playbook was made by someone who shared it freely with the community — the links and names are here so you can star their repos, follow their work, and say thanks. That's the whole game: stand on great work, build something greater, pass it on.

Now go install three of these and feel the difference today.

— Marston Teodoro · Marston AI

Curated June 2026. Skills, star counts and links reflect public sources at time of writing and may change — always check each repo before installing. All trademarks and skills belong to their respective creators; Marston AI claims no ownership, only curation and gratitude.
