WHAT'S INSIDE

Don't build skills. Install them.

A **Claude Skill** is a small folder — usually just a `SKILL.md` file with instructions, plus optional scripts and resources — that Claude loads *on demand* to become an instant expert at a specific job: building videos, writing production React, auditing security, cutting your token bill. You don't prompt-engineer it every time. You install it once, and Claude just *knows*.

Most people approach skills backwards: they open the skill-creator and try to build everything from scratch. That's a waste. Anthropic ships 17 official skills for free, and the community has published 1,500+ more. **The best ones already exist** — proven on GitHub, gone viral on X, recommended on Reddit. This directory is the curated shortlist, with full credit and a link to every author. Steal freely. Ship faster.

HOW TO INSTALL ANY SKILL IN THIS GUIDE

- 1 **Claude.ai (web):** Settings → Capabilities → Skills → *Upload custom skill*, then drag in the skill folder. (Pro/Team plan; Anthropic's official skills are pre-installed for free.)
- 2 **Claude Code (plugin):** `/plugin marketplace add <org>/<repo> then /plugin install <skill> .`
- 3 **Claude Code (npx):** `npx skills add <org>/<repo>` — works for any public GitHub repo.
- 4 **Manual:** clone the repo and copy the folder into `~/.claude/skills/` (global) or `.claude/skills/` (per-project).

Three rules before you go wild. (1) Install 5 to start, not 50 — each skill adds overhead to every session; begin with the ones that match this week's work. (2) Read the `SKILL.md` before installing — some run scripts or auto-update from upstream. (3) Prefer official + named-author skills with real star counts; that's the cheapest reliability signal.

SECTION 01 · ANTHROPIC OFFICIAL

The Official Foundation

Anthropic's own open-source skills (github.com/anthropics/skills, 146k★). If you install nothing else, install these — they make Claude produce real files and ship real interfaces.

01 Document Skills — pdf · docx · pptx · xlsx

ANTHROPIC

`anthropics/skills · by Anthropic`

Create, edit and parse real Office & PDF files — tracked changes in Word, formulas and pivot tables in Excel, templated decks in PowerPoint, form-filling and merging in PDF.

Why it matters. Turns Claude from "writes about a report" into "hands you the finished .docx/.xlsx/.pdf." The backbone of every document workflow.

```
# pre-installed on Claude.ai Pro+ · in Claude Code:
npx skills add anthropics/skills --skill pdf
```

BEST FOR Anyone creating documents, reports, proposals, decks or spreadsheets.

github.com/anthropics/skills

02 mcp-builder

ANTHROPIC

`anthropics/skills/mcp-builder · by Anthropic`

Scaffolds a full Model Context Protocol server so Claude can wire up any external API as native tools.

Why it matters. The fastest way to connect Claude to your own stack — from API docs to a working MCP server in one session.

```
npx skills add anthropics/skills --skill mcp-builder
```

BEST FOR Technical teams with internal APIs that need their own connector.

github.com/anthropics/skills

03 webapp-testing

ANTHROPIC

anthropics/skills/webapp-testing · by Anthropic

Drives your running web app in a real browser via Playwright to verify UI, flows and regressions.

Why it matters. Claude stops guessing whether the feature works and actually clicks through it.

```
npx skills add anthropics/skills --skill webapp-testing
```

BEST FOR *Anyone shipping web apps who wants real verification, not vibes.* github.com/anthropics/skills

04 frontend-design & web-artifacts-builder

ANTHROPIC

anthropics/skills · by Anthropic

Design guidance that dodges generic "AI slop" aesthetics, plus a builder for rich HTML/React + shadcn/ui artifacts.

Why it matters. The difference between a templated page and something that looks intentionally designed — right on the first try.

```
npx skills add anthropics/skills --skill frontend-design
```

BEST FOR *Anyone building interactive demos, dashboards or polished UIs.* github.com/anthropics/skills

05 skill-creator

ANTHROPIC

anthropics/skills/skill-creator · by Anthropic

An interactive, guided builder for packaging your own repeatable workflow into a proper skill.

Why it matters. Once you've outgrown the stash, the most useful skill is one you build yourself — this is the on-ramp.

```
npx skills add anthropics/skills --skill skill-creator
```

BEST FOR *Builders ready to encode their own process into a reusable skill.* github.com/anthropics/skills

06 Creative & Comms pack

ANTHROPIC

algorithmic-art · canvas-design · slack-gif-creator · brand-guidelines · internal-comms ·
claude-api

Generative p5.js art, PNG/PDF visual design, Slack-optimized animated GIFs, brand-consistent output, polished internal comms, and a Claude API helper.

Why it matters. A grab-bag of quick wins that cover the everyday "make this look good / on-brand" asks.

```
npx skills add anthropics/skills --skill brand-guidelines
```

BEST FOR *Founders and ops leads who produce visuals and updates weekly.*

github.com/anthropics/skills

SECTION 02 · SUPERPOWERS & VIRAL

The Viral Game-Changers

The skills that blew up on X and Hacker News in 2026 because they fix how Claude thinks and talks — not just what it builds. Highest ROI on this whole list.

07 grill-me

VIRAL · X

mattpocock/skills/grill-me · by Matt Pocock

Flips the script: Claude interviews *you* relentlessly about your plan — sometimes 50+ questions over ~45 minutes — until every branch of the decision tree is resolved, then writes a single line of code.

Why it matters. Kills the #1 failure mode in agentic coding — Claude charging ahead on wrong assumptions. Pocock's repo hit ~74k★. **Install this first.**

```
# Claude Code plugin
/plugin marketplace add mattpocock/skills
/plugin install grill-me@skills
```

BEST FOR *Anyone who has watched Claude confidently build the wrong thing.* github.com/mattpocock/skills

08 Caveman

VIRAL · #1 HN

JuliusBrussee/caveman · by Julius Brussee

"Why use many token when few token do trick." Strips narration, filler and pleasantries from Claude's output — keeping every code block, error string and symbol byte-for-byte intact.

Why it matters. Cuts output tokens ~65% on average (up to 87%). Real money and context saved on long sessions. Hit #1 trending on GitHub and #1 on Hacker News.

```
npx skills add JuliusBrussee/caveman
```

BEST FOR *Heavy daily users watching their token bill and context window.*

github.com/JuliusBrussee/caveman

09 Andrej Karpathy's Coding Guidelines

VIRAL · 144K ★

multica-ai/andrej-karpathy-skills · by Forrest Chang (from A. Karpathy)

Encodes Karpathy's four anti-frustration principles into one drop-in file: think before acting, prefer simplicity, make surgical changes, stay goal-driven.

Why it matters. Targets the three things that make agents maddening — silent wrong assumptions, over-engineering (50 lines → 500), and touching code it was never asked to.

```
npx skills add multica-ai/andrej-karpathy-skills
```

BEST FOR *Every coder who wants calmer, more surgical agent behavior by default.*

github.com/multica-ai/andrej-karpathy-skills

10 Handoff

VIRAL · X

mattpocock/skills/handoff · by Matt Pocock

Compresses a long, messy session into a clean markdown brief so you can continue in a fresh context window without losing the thread.

Why it matters. The elegant fix for context rot — end a session, hand off, start fresh and fast.

```
/plugin marketplace add mattpocock/skills  
/plugin install handoff@skills
```

BEST FOR *Long multi-session builds that keep hitting the context ceiling.*

aihero.dev/skills-handoff

11 Superpowers

FRAMEWORK · 217K ★

obra/superpowers · by Jesse Vincent

A whole methodology-as-skills: 20+ composable, battle-tested patterns — TDD (red-green-refactor), 4-phase systematic debugging, brainstorming, writing/executing plans, git worktrees, subagent-driven development.

Why it matters. The most complete community skill library going. Turns Claude into a disciplined senior engineer with an actual process.

```
/plugin marketplace add obra/superpowers-marketplace  
/plugin install superpowers@superpowers-marketplace
```

BEST FOR *Serious multi-step engineering where process beats raw speed.*

github.com/obra/superpowers

SECTION 03 · CREATIVE

Video, Design & Creative

Where Claude stops being a coder and becomes a content studio. The Remotion skill alone is worth the price of admission.

12 Remotion — Programmatic Video ★

OFFICIAL · REMOTION

remotion-dev/skills · by Remotion

Teaches Claude the full Remotion framework — React-for-video — so you can prompt animated explainers, product demos, data-viz videos and edits that render to MP4 locally. No After Effects, no cloud render bill.

Why it matters. The standout creative skill of 2026 (~117k weekly installs). Type a prompt, get a real video. Insane leverage for builders making content.

```
npx skills add remotion-dev/skills # see remotion.dev/docs/ai/skills
```

BEST FOR Creators & founders producing video content without an editor.remotion.dev/docs/ai/skills

13 Figma — implement-design & code-connect

OFFICIAL · FIGMA

figma/skills · by Figma

Translates Figma frames into production code with real fidelity, and maps design components to your codebase components.

Why it matters. Closes the design-to-code gap that usually eats a day. Paste a frame, get faithful components.

```
npx skills add figma/skills
```

BEST FOR Teams shipping pixel-faithful UI straight from Figma.officialskills.sh/figma/skills

frontend-slidesby [zarazhangrui](#)

Animation-rich HTML presentations — decks that actually move, generated from a prompt.

github.com/zarazhangrui/frontend-slides**claude-d3js-skill**by [chrisvoncsefalvay](#)

Builds proper D3.js data visualizations — charts beyond the default library look.

github.com/chrisvoncsefalvay/claude-d3js-skill**web-asset-generator**by [alonw0](#)

Favicons, app icons and social/OG share images in every size you need.

github.com/alonw0/web-asset-generator**shadcn/ui skills**by [shadcn](#)

Feeds Claude real shadcn/ui component context and enforces the right patterns.

ui.shadcn.com/docs/skills

SECTION 04 · PRODUCTION WEB

Ship Production Web Apps

Official skills straight from the platforms you deploy on. Each one bakes hundreds of hard-won rules into Claude so your code matches how the experts actually do it.

14 Vercel Agent Skills

OFFICIAL · VERCEL

vercel-labs/agent-skills · by Vercel

react-best-practices (40+ perf rules), **web-design-guidelines** (100+ a11y/UX rules), **next-best-practices**, **composition-patterns**, **writing-guidelines**, and **vercel-optimize** (audits cost/perf/caching/billing).

Why it matters. Turns "it works" into "it's fast, accessible and cheap to run." Some of the highest-signal skills published.

```
npx skills add vercel-labs/agent-skills
```

BEST FOR Anyone building React / Next.js apps for production.github.com/vercel-labs/agent-skills

Stripe — best-practices

Official · Stripe

The right way to build Stripe: idempotency, webhooks, edge cases — payments done correctly.

officialskills.sh/stripe/skills

Netlify — Functions & DB

Official · Netlify

Serverless endpoints, background tasks, and managed Postgres with deploy-preview branching.

officialskills.sh/netlify/skills

Cloudflare — Workers & Durable Objects

Official · Cloudflare

Production Workers patterns and stateful coordination with RPC + SQLite Durable Objects.

officialskills.sh/cloudflare/skills

Sentry — setup & fix-issues

Official · Sentry

Wire up Sentry in any stack, then find and fix production issues with full trace context.

officialskills.sh/getsentry/skills

Expo — native UI & deploy

Official · Expo

Cross-platform mobile with Expo Router, styling and navigation, then ship to production.

officialskills.sh/expo/skills**Hugging Face — trainer & gradio**

Official · Hugging Face

Train models with TRL (SFT/DPO/GRPO) and ship Gradio demos to HF Spaces.

officialskills.sh/huggingface/skills

SECTION 05 · SECURITY

Security & Hardening

Before you ship, let Claude wear a red-team hat. These come from people who break software for a living.

15 Trail of Bits Security Skills

OFFICIAL · TRAIL OF BITS

trailofbits/skills · by Trail of Bits

21+ security skills from one of the most respected audit firms: CodeQL & Semgrep static analysis, a **semgrep-rule-creator**, vulnerability detection, threat modeling, and **building-secure-contracts** covering six blockchains.

Why it matters. Professional-grade auditing baked into your agent. Catch the bug before an attacker does.

```
npx skills add trailofbits/skills
```

BEST FOR Anyone shipping code that handles money, data or untrusted input.

github.com/trailofbits/skills

16 ffuf Web Fuzzing

COMMUNITY

jthack/ffuf_claude_skill · by Jason Haddix (jthack)

Teaches Claude to drive **ffuf** for web fuzzing — including authenticated requests — to find hidden endpoints and parameters.

Why it matters. Hands-on recon for authorized pentesting and bug-bounty work, guided by an experienced hacker.

```
npx skills add jthack/ffuf_claude_skill
```

BEST FOR Security researchers and bug-bounty hunters (authorized testing only).

github.com/jthack/ffuf_claude_skill

SECTION 06 · GROWTH

Marketing & Growth

You're an AI builder — building it is half the job. These turn Claude into a growth team that knows real marketing frameworks, not generic fluff.

17 Corey Haines' Marketing Skills

COMMUNITY · 50+

`coreyhaines31/marketingskills` · by Corey Haines

A full SaaS marketing stack as skills: conversion-rate optimization, copywriting, SEO audits, email lifecycle flows, paid ads (Google/Meta/LinkedIn/X), analytics, retention, growth engineering and strategy.

Why it matters. From a well-known SaaS marketer — Claude stops writing vague copy and starts applying actual CRO and positioning frameworks.

```
npx skills add coreyhaines31/marketingskills
```

BEST FOR *Founders and solo builders doing their own marketing.*

github.com/coreyhaines31/marketingskills

18 Direct-Response Advertising Skills

COMMUNITY

`realkimbarrett/advertising-skills` · by Kim Barrett

Classic direct-response craft: customer-avatar work and Eugene Schwartz-style copywriting for ads that convert.

Why it matters. Pairs perfectly with the marketing pack when you're writing paid creative that has to sell.

```
npx skills add realkimbarrett/advertising-skills
```

BEST FOR *Anyone writing paid ads, sales pages or VSL scripts.*

github.com/realkimbarrett/advertising-skills

SECTION 07 · DATA & MOBILE

Data, Science & Mobile

Specialist skills for when the work gets technical — research, scientific computing, automation and shipping to phones.

claude-scientific-skills

by K-Dense-AI

Wires in scientific libraries and specialized database access for real research workflows.

github.com/K-Dense-AI/claude-scientific-skills

Firecrawl Skill + CLI

by Firecrawl

Web scraping, search and browser automation built for AI agents — clean data in, no HTML mess.

github.com/firecrawl/firecrawl

ios-simulator-skill

by conorluddy

Builds, boots and tests iOS apps in the simulator automatically — Claude iterates on a real device window.

github.com/conorluddy/ios-simulator-skill

get-shit-done

by TÂCHES

Meta-prompting + spec-driven development system that keeps long builds on rails.

github.com/gsd-build/get-shit-done

playwright-skill

by lackeyjb

Standalone browser automation via Playwright — scraping, E2E flows and UI checks on any site.

github.com/lackeyjb/playwright-skill

Skill_Seekers

by yusufkaraaslan

Converts any documentation site into a ready-to-use skill — feed it docs, get a SKILL.md.

github.com/yusufkaraaslan/Skill_Seekers

SECTION 08 · DISCOVERY

Where to Find More

This guide is a curated starting line, not the whole field. When you want to go deeper, these are the best-maintained directories the community trusts. Bookmark them.

HUB	WHAT'S THERE	LINK
anthropics/skills	The official source. Reference implementations + production document skills. 146k★.	github.com/anthropics/skills
VoltAgent/awesome-agent-skills	1000+ skills from official dev teams (Anthropic, Vercel, Stripe, Cloudflare, Figma...) and community.	github.com/VoltAgent/awesome-agent-skills
travisvn/awesome-claude-skills	Long-running, well-curated list of the best Claude skills and tools.	github.com/travisvn/awesome-claude-skills
karanb192/awesome-claude-skills	50+ hand-verified skills, actively maintained, neatly categorized.	github.com/karanb192/awesome-claude-skills
ComposioHQ/awesome-claude-skills	1000+ production-ready skills & plugins across many coding agents.	github.com/ComposioHQ/awesome-claude-skills
officialskills.sh	Browsable directory of <i>official</i> vendor skills, install-ready.	officialskills.sh
hesreallyhim/awesome-claude-code	Broader Claude Code list: skills, hooks, slash-commands, agents, plugins.	github.com/hesreallyhim/awesome-claude-code

IF YOU ONLY DO ONE THING

The starter pack. Install these five.

Skills compound badly when you have too many — each one adds overhead to every session. So don't install the whole directory. Start with these five, feel the difference this week, then add more only when you hit a wall the existing ones can't solve.

- 1 **grill-me** — stop Claude building the wrong thing. The single highest-leverage install. · Matt Pocock
- 2 **Document Skills (pdf · docx · xlsx · pptx)** — real files out, not just text. · Anthropic
- 3 **Caveman** — cut ~65% of output tokens with zero loss of substance. · Julius Brussee
- 4 **Superpowers** — give Claude an actual senior-engineer process. · Jesse Vincent
- 5 **Remotion** — turn prompts into real videos. Pure content leverage. · Remotion

BUILD FASTER · SHIP SMARTER · GIVE CREDIT

The best ones already exist. Now go install them.

Every skill in this playbook was made by someone who shared it freely with the community — the links and names are here so you can star their repos, follow their work, and say thanks. You don't need to code it from scratch; you need to know what already exists and how to wire it together.

That's the whole NoCode AI Army playbook. Install three of these today and feel the difference.

— Marcin Teodoru · Marcin AI · Founder, AI Builders

Curated June 2026. Skills, star counts and links reflect public sources at time of writing and may change — always check each repo before installing. All trademarks and skills belong to their respective creators; Marcin AI claims no ownership, only curation and gratitude.
